AIRFLOW PERFORMANCE, INC.
REPAIR STATION OPERATIONS SPECIFICATION CAPABILITIES LIST

Title: Introduction
Page No. i
Issue Date: 11-7-97
Revision No. 7
Revised 7-31-14

This Capabilities List is to be used with and considered a part of Airflow Performance Inc.'s Repair Station Operations Specifications. It contains a listing of all parts by manufacturer model and part number. The Capabilities List may be revised as required when new parts are added to Airflow Performance Inc.'s capabilities. At such time the corresponding section, model and parts list page will be revised and the List of Effective Pages will be changed to reflect the addition. No component will be returned to service unless it has been added to the Capabilities List, and all requirements of the Inspection Procedures Manual have been complied with.

The models are listed under the heading model followed by that model's part number then a brief description under the description heading.

Maintenance on parts listed in the following sections is limited to inspection, repair, testing or overhaul in accordance with the manufacturer's instructions and FAA approved methods, techniques and practices as stated in the Repair Station Manual.
